Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of a reply to the previous Office Action, filed April 23, 2004.

Amendments were made to the claims. Specifically, new claim 31 was added.

Claims 26-31 are pending and under consideration in the instant application. Any rejection of record in the previous Office Action, mailed November 3, 2003, that is not addressed in this action has been withdrawn.

The previous Enablement rejection under 35 USC § 112, first paragraph has been withdrawn upon consideration of Applicant's arguments. As such, applicant's arguments regarding the enablement rejection are considered moot.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 26-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is a new rejection that is not necessitated by the amendments to the claims.**

This is a New Matter rejection concerning the term "raising the temperature to greater than 65°C." The instant claims were amended post-filing of the application to contain the term "raising the temperature to greater than 65°C" (see for example the amendment filed in response

Art Unit: 1636

to the Election/Restriction requirement, August 22, 2003). The instant specification as filed provides no written support for the term "raising the temperature to greater than 65°C." Rather, the specification only provides an example where the temperatures of 65°C and 75°C are used in a manner set forth in the claims. Recitation of these two individual temperatures neither inherently, implicitly nor explicitly includes the range of temperatures between the two points. Alternatively, there is no support in the specification to indicate the use of the full range of temperatures set forth in the claims, or any points in between 65°C and 75°C, nor is there a suggestion in the specification to use a temperature in between 65°C and 75°C. Furthermore, there is no positive assertion that any such temperature would be applicable to the claimed method. As such, the term represents new matter that has been added to the specification, and is subject to a rejection under 35 USC § 112, Written Description.

Allowable Subject Matter

No claims are allowable.
